www.chimei-motor.com

Upgrade your parking system right now!

Object detection

Can detect moving & static obstacles.

View angle changing

Can be manually switch to bird view angle.

Function

- **Object detection warning**
 - Moving object (pedestrian, bicyclist, motorcycle, etc...)
 - Obstacle object (pallet, wall, rack, etc...)
- **Parking distance control**
 - View angle changing for close range (Manually changing)
 - Screen zoom in function
- **Screen zoom in & out function**

Feature

- Suitable for most rear view camera & monitor in the market.
- Directly upgrade your existed rear view system as a rear obstacle detection system, even better than that!
- Intuitive detection target display design.
- One-button setting for switch 3 modes of operation.
- Supporting CVBS video output format.
- Super easy installation. (plug and play)
- Better recognition for lower and thin-shape obstacle objects.
- More cost effective than installation of ultrasonic radar.

Screen zoom in

Can be manually zoom in and out by film switch.
